Detailed Action

This is the first Office Action corresponding to original filing. Claims 1-26 are active.

Claim Objections

The numbering of claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. When claims are canceled, the remaining claims must not be renumbered. When new claims are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not).

Misnumbered claims 20-27 have been renumbered as 19-26. There is no claim 19 in the original claims.

Claim Rejections - 35 USC § 112

Claims 9 and 22 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. No proper antecedent is found in line 2, for "the base of the nose".

Art Unit: 3632

Claim Rejections - 35 USC § 103

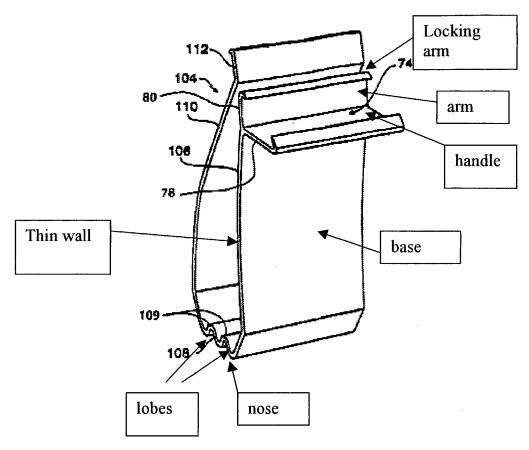

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-8, 10 and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Davis et al. (Pat No 5,955,170).

The patent to Davis et al. does not show shield but the shield is broadly claimed here; in fact the present invention is directed to a clip as illustrated in instant Fig 3. The patent to Davis et al. shows a clip comprising all the elements recited here as shown in the figure below, and it is considered capable of been used with a shield. As to claims 10 and 11, please note that the display unit is not part of the instant invention and accordingly it has no patentable weight.

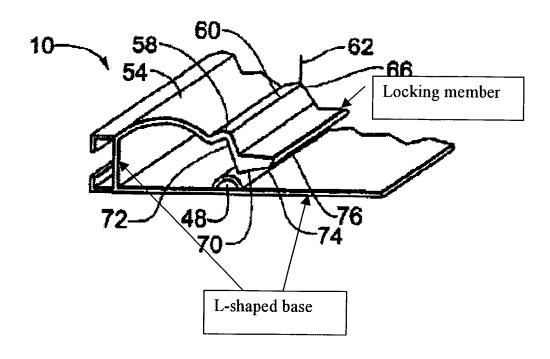

Art Unit: 3632

Claims 1, 12 and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wear (Pat No 6,637,716).

The patent to Wear does not show shield but the shield is broadly claimed here; in fact the present invention is directed to a clip as illustrated in instant Fig 3. The patent to Wear shows a clip comprising all the elements recited here as shown in the figure below, and it is considered capable of been used with a shield.

Art Unit: 3632

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 14-21, 23 and 24 are rejected under 35 U.S.C. 102(b) as being anticipated by Davis et al. Please refer to the explanation of Davis et al. recited above. Applicant is reminded that the screen is not a positive element of the instant invention.

Art Unit: 3632

Claims 14, 25 and 26 are rejected under 35 U.S.C. 102(e) as being anticipated by Wear. Please refer to the explanation of Wear recited above.

Allowable Subject Matter

Claims 9 and 22 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: none of the art of record discloses a clip comprising a locking member extending from the nose.

Conclusion

The cited art not relied upon is considered pertinent to instant invention.

Lazan, Jr. (3,163,385), Greenberg (4,556,183), Valiulis et al. (6,378,828),

Vilims (RE 37,688), Gebrara (6,601,809) and Hays (US 2004/0004169 A1) all show clips of interest.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to RAMON O. RAMIREZ whose telephone number is (703) 308-0748. The examiner can normally be reached on MONDAY-FRIDAY, IST FRIDAY OFF.

Art Unit: 3632

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, LESLIE BRAUN can be reached on (703) 308-2156. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
